

# Bathroom Adaptation Customer Testimonial

Mr. P in Powys was awarded a grant from Care & Repair to have his ensuite bathroom in his static home converted to a level access wetroom.

*“The new bathroom is brilliant and is so much better...”*

**Why did you choose GB Electrical & Building Services Ltd to complete the work?**  
GB was one of the companies recommended to us by Care & Repair.

**Did the service meet your expectations?**

Excellent, Oh yes, it's absolutely wonderful. I like every bit of it. It looks beautiful. The old bathroom was done in 1989 so the transformation is amazing. The wife was originally worried about the mess of having builders in but she needn't have; they were very clean and cleaned up after themselves each day. It's an excellent job. 100% good.

**How has it impacted your daily life?**

It's a lot better, a lot easier. I used to struggle to get in and out of the shower. The old shower was 30 years old and didn't really work anymore. The new bathroom is brilliant and is so much better. There are lots of perfectly positioned grab rails, which makes it much safer.

**Tips and advice for anyone else looking to have an adaptation**

Definitely recommend anyone to have one. I'd recommend GB to anyone. I've already told one or two already to go for it.

**If you were to recommend us, what you say?**

Thank you to everyone concerned that helped us to do this. It is 100% better than it was. It's fantastic!
